DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 6:

The primary reason for the allowance of claims 1 and 6 is the inclusion of a time difference detection circuit which detects time difference between the signal to be measured and the reference clock, a time expansion circuit which expands an output pulse width of the time difference detection circuit by a given magnification and a second counter which counts the reference clocks during the pulse width which is expanded by the time expansion circuit. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-5, 11 and 13 are allowed due to their dependency on claim 1.

Claims 7-10, 12 and 14 are allowed due to their dependency on claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following is cited to further show the state of the art with respect to frequency measuring methods and devices in general:

U.S. Patent No. 6,233,529 to Nonaka discloses a frequency measuring device including a second counter and time expansion circuit. Nonaka does not teach a time difference detection circuit.
